Summary:

Data Analyst with 4+ years of experience turning complex dataset into actionable insights. Skilled in SQL, Python, Excel (VBA), and Power BI, with proven expertise in automation, ETL processes, and data visualization. Recognized for building tools that save time, improve accuracy, and support strategic decision-making. Highly adaptable and results-driven with passion for using data to solve real-world business problems and enhance performance.

Work Experience:

Circana | Senior Analyst **Feb 2025 – Present**

- Developed a VBA based Excel tool and custom add-in that automates 6+ recurring processes, improving consistency across the data value-chain and saving the team ~20 hours per month.
- Designed and implemented a Business Prioritization Tracker using Power Atomate, enabling automated email alerts and task sequencing, resulting in faster response time and clearer workload management.
- Designed and developed a centralized Excel automation toolkit using VBA and Custom Ribbon XML, providing users with streamlined access to productivity-enhanced macros.
- Collaborated with cross-functional teams identify and resolve inefficiencies in database logic, improving data accuracy and reducing reprocessing errors by 15%.
- Built a scenario-based forecasting calculator in VBA to support budge planning and resource allocation, turning fragmented data into clearer and decision-ready models.
- Queried and optimized SQL queries to extract, clean, and validate data, driving deeper business insights and more reliable decision making.

Opinium | Data Analyst **Nov 2023 – Jan 2025**

- Streamlined ETL processes by integrating multiple data sources into a unified database, reducing manual consolidation time by 30% and enabling faster reporting.
- Designed and maintained Power BI dashboards and client facing reports, ensuring real-time, accurate insights for stakeholders.

- Conducted data validations and implemented quality checks that improved reliability of reporting outputs across multiple projects.
- Translated complex datasets into clearer business recommendations that directly influenced strategy and operational improvements.

Opinium | Junior Data Analyst **Jan 2022 – Nov 2023**

- Scripting and deployed customized surveys that were used primarily for data collection.
- Improved data quality by detecting and resolving data inconsistencies, duplicates, and missing values establishing repeatable processes for cleaner outputs.
- Prepared large datasets using SQL and Excel Power Query for analysis, enabling more efficient reporting and turnaround time.
- Developed a VBA function leveraging Google Translate API to automatically detect the any language and convert it to English, enhancing multi-language survey processing.

Skills:

Data Management	PostgreSQL, SQL server, MDM and ETL workflows
Programming & Automation	Python (Pandas, NumPy, matplotlib, seaborn), SQL and VBA
Analytics tools	Power BI, Power Query and SPSS

Education:

Stellenbosch University | BSc (Hons) Geo-informatics	**2021**
University of Fort Hare | BSc GIS and Geology	**2015 - 2017**
Shayamoya Area Secondary | Matric	**2010 - 2014**

Personal Information:

Date of Birth	05 05 1995
Languages	English, IsiXhosa and IsiZulu
Drivers licence	C1/Code 10
Relocation	Yes
